

Vaccines

Make sure your children are protected

Vaccinations - or baby shots - shield kids from diseases and help keep them healthy. Here are tips to remember:

- Start your baby's vaccinations on time and keep them up-to-date.
- Ask the doctor or nurse what to expect after the shot.
- Take your child's vaccination records with you to every doctor visit.
- Keep vaccination records in a safe place - you will need them for school and child care.
